Neuro-Linguistic Programming

NLP is an attitude..

characterised by a strong sense of curiosity and adventure, tenacity, and an insatiable desire to learn and to apply that learning.

NLP is a methodology..

based on the idea that all behaviour has a structure, and that, because you can identify its structure, you can model it, learn it, teach it, and change it to help you achieve the results you truly desire.

NLP is a technology..

that enables you to organise information and perceptions in ways that are most meaningful and useful to you, and that allows you to achieve the kind of results you previously could only dream of.
